# Catalyst Award

IS PRESENTED TO

Dar-Wei Chen

## Significant Impact to Joint Staff Sponsor Outcomes - TRAX and STITCHES Comparative Analysis

Directed by the Joint All Domain Command and Control Cross Functional Team (JADC2 CFT) lead - BGEN Rob Parker – and working on a very compressed timeline, the TRAX and STITCHES Comparative Analysis team canvassed subject matter and technical experts on the two systems, gateway operations, and message formatting functionality, visited multiple sponsor and exercise sites during a pandemic, and developed a first-ever analytical template to produce a comprehensive report on these two technological solutions capabilities. This assessment, presented at the May 2021 senior level JADC2 CFT monthly meeting, represents the first real data-driven assessment of JADC2 technological solutions. MITRE's results were extremely well-received by all, with extended praise from BGEN Parker and the rest of his government team. This analysis will serve as a baseline for future analyses, driving data-informed decisions on future JADC2 technologies. Congratulations and thank you for a job very well-done! You make us all very proud!

Tom Wright, Jr.  
Department Manager, N253

About the Catalyst Award. This award recognizes small teams and individuals for stand-out contributions that align with our values and behaviors.
